

Stop Cleaning Around It. Start Cleaning It.

HALPAQ specializes in the design and manufacture of baggers for powders, granules, and bulk products. Part of the FIDEIP Group, HALPAQ supports industrial clients in optimizing production lines, combining performance, reliability, and strict sanitary standards. With a wide range of baggers capable of reaching speeds up to 600 bags per hour, HALPAQ delivers solutions tailored to diverse production needs. The quality of construction, equipment durability, and dosing precision are at the heart of HALPAQ. But the company's true distinction lies in a world-first innovation: fully washable machines. This exclusive technology enables complete and safe cleaning of equipment, meeting the strictest requirements of the food, chemical, and pharmaceutical industries. With this, HALPAQ provides clients with significant gains in hygiene, safety, and maintenance efficiency, while minimizing the risk of cross-contamination.
